PREPARED FOR
iDeliver III — Operations
 iDeliver III delivery management suite
 Valid for 30 days

Subject: New module — third-party delivery companies (handover, collection, settlement and statements), including the carrier portal

Orders that fall outside the areas we cover are handed to an outside delivery company. This module records that handover and the money that moves with it, so a delivery carried by somebody else is still a delivery we can account for. Each item is priced individually so that any of them may be accepted, deferred or declined without affecting the others.

Section A — The carrier and the handover

Recording the delivery companies themselves, the areas they cover, and the act of handing an order to one of them.

REF	DESCRIPTION	PRICE (USD)
A1	Delivery company as a party in its own right A fourth party type beside customers, partners and suppliers, with its own list, form, contact details and account numbers.	200.00
A2	Coverage areas The zones each delivery company serves, so the office is offered the right company for the address on the order.	225.00
A3	Handing an order to a delivery company The order form records which company took it, the fee agreed for the run and the date of handover, and stops an order being given to a company and to one of our own drivers at the same time.	375.00
A4	Handed-over orders in the order list A badge naming the company on the row, and a filter to read the day by company.	150.00
Subtotal — Carrier & handover		950.00

Section B — The money

What each delivery company owes us and what we owe them, per currency, with the record of every settlement between us.

REF	DESCRIPTION	PRICE (USD)
B1	Delivery company account: delivered, collected, paid, balance One page per company: orders handed over, orders delivered, money collected, money settled and the balance outstanding — each figure per currency, with no conversion between currencies.	550.00
B2	Who collected the money Handles both directions: the company collects at the door and owes us the balance less their fee, or we collect and owe them their fee. An order says which applies.	225.00
B3	Settlements with the delivery company Recording a payment made to a company or received from one, with its date, currency, method and note, and the history of every settlement on the account.	350.00
B4	Statement by date range, with PDF Any period, printed as a statement showing every order, every settlement and the closing balance — the same form as the partner and credit-customer statements already in use.	275.00
Subtotal — Money & settlement		1,400.00

Section C — Reports and integrity

Making sure an order carried by somebody else is counted correctly everywhere the existing reports already count orders.

REF	DESCRIPTION	PRICE (USD)
C1	Handed-over orders in the existing reports Closed Orders, Performance and Customer Categories separate work we carried ourselves from work carried for us, so neither revenue nor volume is overstated.	325.00
C2	Driver settlements and Cashier Box An order carried by an outside company is not a driver's to answer for, and the money it produced enters the box by a different door. Both are corrected so the daily figures still reconcile.	225.00
C3	Dashboard summary Orders out with delivery companies today, and what is owed in each direction, on the main screen.	125.00
Subtotal — Reports & integrity		675.00

Section D — Delivery

One release of the office application. No new version of the driver application is required: an order handed to an outside company never reaches a driver's device.

REF	DESCRIPTION	PRICE (USD)
D1	Data migration, testing and release Recording the delivery companies already in use, testing against real orders in each currency, and installing the release.	275.00
Subtotal — Delivery		275.00

Section E — Carrier portal (optional)

A sign-in for the delivery companies themselves, on the same portal the partners and suppliers already use. Optional, and can be added later without reworking sections A to D.

REF	DESCRIPTION	PRICE (USD)
E1	Sign-in scoped to their own orders A delivery company signs in and sees only the orders handed to them — never another company's work, and never the customer list.	350.00
E2	They declare delivery and collection The company marks an order delivered and states what was collected, which lands in the office as a figure to confirm rather than a phone call to write down.	300.00
E3	They read their own statement The same statement as B4, for their own account only.	150.00
Subtotal — Carrier portal		800.00

Carrier & handover	950.00
Money & settlement	1,400.00
Reports & integrity	675.00
Delivery	275.00
Carrier portal	800.00
Total before discount	4,100.00
Special discount (10%)	- 410.00
TOTAL PAYABLE	USD 3,690.00

Terms and conditions

1. Prices are in US Dollars and exclude any third-party or platform fees (application store accounts, hosting, SMS or mapping charges), which are billed at cost if incurred.
2. This quotation is valid for 30 days from the date above.
3. Payment terms: 50% on acceptance, 50% on delivery.
4. The delivery company account reports exactly these figures, each per currency: orders handed over, orders delivered, amounts collected by the company, amounts collected by our office, the company's fees, amounts settled in each direction, and the outstanding balance. Figures beyond this list are quoted separately.
5. The fee for a run is entered on the order. A tariff table, in which each delivery company carries its own price list by area, is not included in this quotation and is estimated at USD 300 to 400 if it is required.
6. Balances are held per currency and are never converted between currencies, matching how every other account in iDeliver III already works. A rate of exchange, if one is ever wanted, is a separate item.
7. No new version of the driver application is required, so no rollout to drivers' devices is involved and none is charged for.
8. Defects in the delivered items are corrected free of charge for 30 days after delivery. New requirements raised after acceptance are quoted separately.
